 Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                             1044

mitted (DEC-2002) to the EMBL/GenBank/DDS databases.
FUNCTION: Catalyzes the NADP-dependent rearrangement and
of 1-deoxy-D-xylulose-5-phosphate (DXP) to 2-C-methyl-D-
4-phosphate (MEP) (By similarity).
CATALYTIC ACTIVITY: 2-C-methyl-D-erythritol 4-phosphate
= 1-deoxy-D-xylulose 5-phosphate + NADPH.

PATHWAY: Nonmevalonate terpenoid biosynthesis pathway; s
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SIMILARITY:

-deoxy-D-xylulose 5-phosphate reductoisomerase (EC 1.1.1.267) (DXP eductoisomerase) (1-deoxyxylulose-5-phosphate reductoisomerase).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     lature 413:852-856(2001).
i    FUNCTION: Catalyzes the NADP-dependent rearrangement and reductio
i    FUNCTION: Catalyzes the NADP-dependent rearrangement and reductio
i    for 1-decoxy-D-xylulose-5-phosphate (DXP) to 2-C-methyl-D-erythrito
4-phosphate (MEP) (By similarity).
i    CATALYTIC ACTIVITY: 2-C-methyl-D-erythritol 4-phosphate + NADP(+)
= 1-deoxy-D-xylulose 5-phosphate + NADPH.
i    PATHWAY: Nonmevalonate terpenoid biosynthesis pathway; second

-i - FUNCTION: Catalyzes the NADP-dependent rearrangement and reduction of 1-decoxy-D-xylulose-5-phosphate (DXP) to 2-C-methyl-D-erythritol 4-Phosphate (MEP) (By similarity).

-i- CATALYTIC ACTIVITY: 2-C-methyl-D-erythritol 4-Phosphate + NADP(+)

= 1-deoxy-D-xylulose 5-phosphate + NADPH.

-i- PATHWAY: Normevalonate terpenoid biosynthesis pathway; second
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       EMBL; U32763; AAC22466.1; -.
